1. Introduction

1.1 Objectives

Canadian Derivatives Clearing Corporation (CDCC) acts as the central clearing counterparty for exchange-traded derivative products in Canada and for a growing range of customized financial instruments. CDCC also offers customized central counterparty clearing services under the 'Converge' name.

Primary objectives for CDCC are to:

- Provide balance sheet relief for market Clearing Members through the provision of trade novation functionality at a Central Counterparty (CCP) facility. It should be noted that the deliverable portion of the Futures contracts will, where applicable, net with the deliveries of CDCC's Fixed Income deliveries.
- Enable Clearing Members in the Derivative market to achieve their goals of having a deeper, more transparent, and efficient market that effectively mitigates counterparty risk, even under extreme circumstances.
- Provide a Risk model that aligns well with international standards for other CCPs performing similar functions.
- Provide flexibility from a technology standpoint for the introduction of new products and/or to adjust to regulatory protocols.

1.2 Audience

This document is intended as a reference for the 'back office' staff that interfaces with CDCC Corporate Operations.

This is a consolidation of numerous source documents.

Note: **Additional Documentation** – as an individual that interfaces with the clearinghouse, it is imperative that a working understanding of the **Rules** and **Operations Manual** is obtained.

Both of these documents are available on CDCC's web-site (www.cdcc.ca) at the direct link below:

http://www.cdcc.ca/publications_rules_en.

2. Day-to-Day Services Support

2.1 Corporate Operations Team

“Corporate Operations is the single point of contact for the Clearing Members.”

The Corporate Operations team is a group of 14 individuals in two centres (Toronto and Montréal). When a question or inquiry is presented to CDCC (via phone or e-mail), Corporate Operations will:

- Respond to e-mail inquiries within 15 minutes during business hours
- On the vast majority of calls or e-mails: address the inquiry immediately
- If a question requires other resources within CDCC, Corporate Operations will follow the inquiry and will supply the answer when available. All inquiries from the Clearing Members are addressed via a “best efforts” basis. CDCC expects all inquiries to be answered same day, however if this is not possible, a status at the end of the business day will be given.

Corporate Operations will reach out to the Clearing Members via phone or e-mail for:

- Intra-Day Margin Call shortfalls
- Settlements
- Collateral maturing
- Exceptional issues such as ‘exception monitoring’
- General Derivatives CCP Service Issues

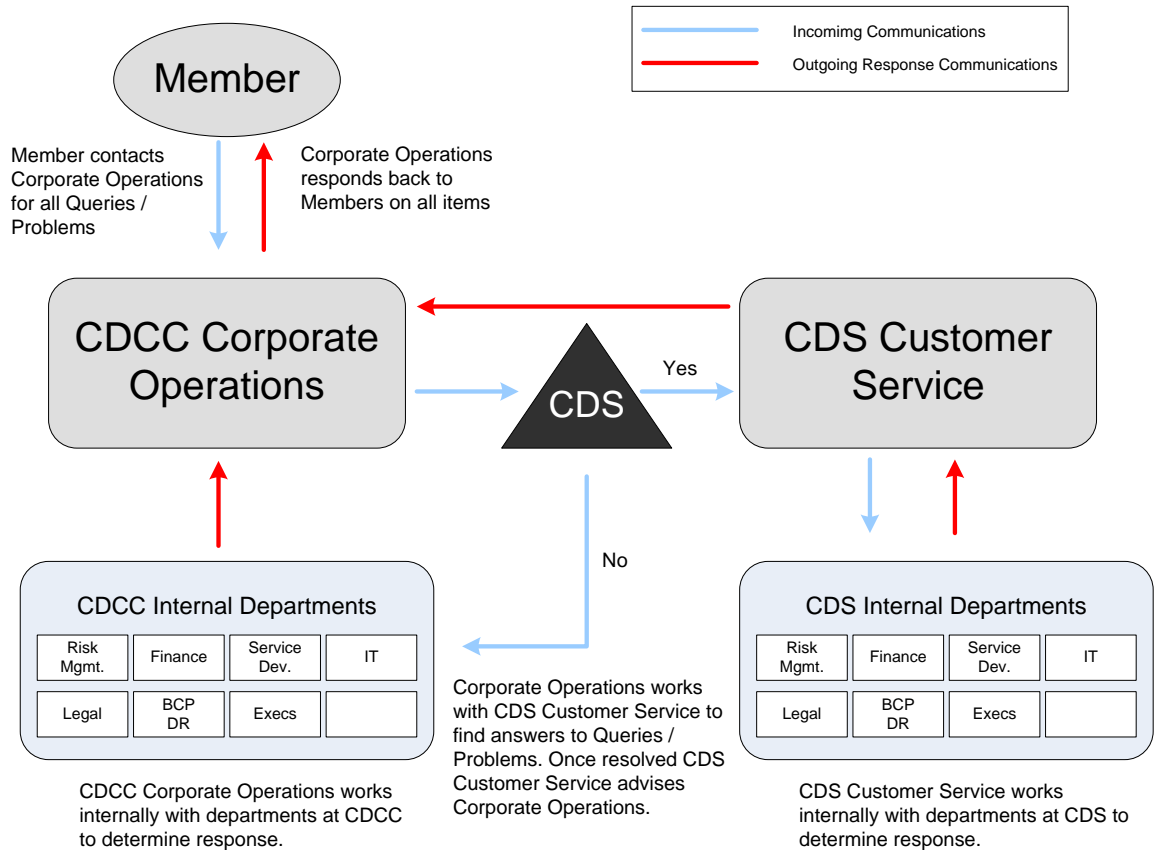

Corporate Operations performs Operational Support for the Clearing Members and for the Clearinghouse to ensure that CDCC’s commitments to the Clearing Members with regards to timelines, as defined in **Section 2** of the **Operations Manual**, are met. Furthermore, its tasks include:

- Contingencies for report & file deliveries
- ‘How to’ questions with regards to Canadian Derivatives Clearing Service (CDCS)
- End User training
- Access Management
- Configuration – ISINs, CUIDs, Internal Account, Products – Classes and Series.

2.2 Overview of an Inquiry

1. Clearing Members are to contact Corporate Operations for all Exchange Traded and OTC Derivatives Central Counterparty (CCP) related information or requests.
2. If the request is made by e-mail, Corporate Operations has a process by which the department is aware that the inquiry is being addressed and when the inquiry has been satisfied. In both e-mail and phone contact, it is up to each Corporate Operations staff member responding to track and resolve the issue.
3. Corporate Operations determines if the request, regarding Exchange Traded and OTC Derivatives contract involves CDS.
4. If the request, regarding an Exchange Traded and OTC Derivatives contract does not involve CDS, Corporate Operations will engage the appropriate internal department if needed, or resolve the request within the Corporate Operations Department.
5. If the request regarding an Exchange Traded and OTC Derivatives contract, does involve CDS, then Corporate Operations shall contact CDS' Customer Service Department. CDS Customer Service shall engage the appropriate internal department if needed, or resolve the request within the Customer Service Department.
6. CDS Customer Service shall update CDCC Corporate Operations on the status of the request.
7. Corporate Operations shall track and remain the point department until the request is resolved.
8. Once a reply to the Clearing Member is ready, all internal departments or CDS will forward the information to CDCC Corporate Operations to be communicated to the Clearing Member and copy CDS as appropriate.
9. For New Clearing Member Bring-On: CDCC shall advise CDS of any requests for New Clearing Member Bring On. In turn CDS shall advise CDCC of any participant wishing to join the CCP.

The following illustration provides a high level description of how member's queries and requests are dealt with on a day-to-day basis. This does not include technology incidents or Severity 1 issues as these are covered in other sections.

3. Stakeholder Communications Management

“Corporate Operations supports the Clearing Members and the Industry Stakeholders via communication.”

Notices to Members (*PUBLIC*)

- Notices to Members (NTM) are sent to the Clearing Members via the firm’s web site, the Clearing Members’ secured web site, and e-mail.
- CDCC’s Notices to Members (NTM) is the method used by the Clearinghouse to inform interested parties of items that may affect an investor.

Operational Notices (*PRIVATE – Clearing Members only*)

- CDCC’s Operational Notices are used by the Clearinghouse to inform the Clearing Members of items that may affect their back office.
- Typical Operational Notices inform the Clearing Members of production schedules or changes in processes.
- Operational Notices are sent to the Clearing Members, either on the Clearing Members’ secured web site, or by e-mail.

Telephone Calls

- CDCC Toronto 416-367-2470
- CDCC Montréal 514-871-3545

Group Emails

- Inbound to CDCC – cdcc-ops@cdcc.ca
- Outbound – group e-mails created by Clearing Members

Provide important information to the Clearing Members specific activities (in standard formats) such as:

- Margin calls
- Net Settlement Obligation escalations for Exchange Traded and OTC Derivatives contracts
- Processing of Intra-Day debit notification
- Notifying the Clearing Members that Collateral pledged is maturing
- Notifying the Clearing Members of incorrect entries onto SOLA Clearing component of CDCS.

Provide important information about the service relevant to all Clearing Members:

- System outage/issue – regular status updates
- Reminder of special holiday processing (for example: Remembrance Day, November 11)
- General information – upcoming User Group meeting, Training Sessions being held, etc.

User Forum (*Users' Group Meetings*)

- As part of CDCC's commitment to its membership, periodic Users' Group meetings are held to address issues and to promote an open line of communication. This group's purpose is to offer direction to the corporation on issues that directly affect the membership.
- CDCC Users' Group meetings are held on a quarterly basis. CDCC will provide a facility in Montréal and Toronto that will be linked via video-conference. CDCC will provide a facility for those Clearing Members in other centres who wish to attend via conference call.
- CDCC invites key stakeholders outside of Clearing Members to these meetings. The Montreal Exchange, The Options Clearing Corporation (OCC) and vendors are also part of this group.
- A quorum is not required for a meeting to take place.

Extranet

The extranet (the private website for the Clearing Members) contains important information. Listed below are just a few:

- Notices to Members
- Operational Notices
- Technical Documents
- Users' Groups pre-mail and minutes
- Project Deliverables
- Forms for contingency planning

4. CDCC Business Continuity and Disaster Recovery

4.1 Governance

- CDCC's Business Continuity (BC) and Disaster Recovery (DR) Governance Model extends from TMX Group's as CDCC is a defined Business Unit within the corporate umbrella.
- CDCC's Steering Committee is the key decision-making and governing authority. The CDCC Steering Committee 'reports' to the TMX SMT (Senior Management Team) and is part of the TMX CMT (Crisis Management Team – CDCC's President & Chief Clearing Officer)
- CDCC's Working Committee is the operational team executing portions of the Business Continuity Plan (BCP), ensuring it is accurate and up-to-date. The team is responsible for testing and training.
- TMX-IT (TMX Information Technology) acts as support for BCP and is responsible/custodian for the Disaster Recovery Plan (DRP).
- TMX Risk Management acts as the coordinator for BCP and provides support, advice, counsel and information when necessary.

4.2 Definitions

Disaster Recovery Plan (DRP): This is the portion of CDCC's Business Recovery Program that defines the recovery of its most important IT related systems, infrastructure, applications and telecommunications.

4.3 Details – DRP

- CDCC's DRP was instituted with the implementation of its previous clearing application in the 1989-1990 timeframe.
- CDCC maintains mirrored servers for Production and DR. The primary site (Production) is housed in the TMX Group's data center north of Toronto. The backup—DR is housed in a TMX Group Toronto location.
- The Primary Production facility is also redundant with (Master/Slave infrastructure)
- High speed dedicated circuits are maintained between Production and DR.
- Client (Clearing Members and CDCC staff) connectivity is managed by the TMX-IT Network team. Switching is transparent to the end users.

4.4 Strategy – DRP

- The overall strategy of CDCC's DRP is that there is a 'Hot' backup site of CDCC's production environment.
- In the case of the loss of the Primary data centre, CDCC's 'Hot' site would become the production site.

4.5 Responsibility – DRP

- The TMX IT group has responsibility to maintain, support, and update the DRP. CDCC acts as the information provider. TMX IT acts as the custodian.

4.6 Details – BCP

- CDCC has two (2) independent offices; one in Montréal, and one in Toronto. This is the first level of Business Continuity.
- The Recovery Time Objective (RTO) for CDCC is 2 hours.

4.7 Updates – BCP

- CDCC's Manager BCP/DRP & Regulatory Coordination assumes the responsibility of maintaining the BCP.

4.8 Strategy – BCP

CDCC's business model includes two operational centres. CDCC Corporate Operations has staff in both the Montréal and Toronto offices. In the case of an emergency, CDCC can operate effectively from one centre. If a loss of an office is expected to be prolonged, CDCC has access, immediately to a backup office.

- In Montréal, CDCC has a dedicated facility, outside of the downtown core.
- In Toronto, CDCC has a dedicated facility, outside of the downtown core.
- In addition to the above, CDCC staff has the ability to work remotely through Citrix.

4.9 Activation Process – BCP

CDCC's BCP activation is the responsibility of the CDCC Steering Committee.

4.10 Responsibility – BCP

CDCC has continued responsibility and maintenance for BCP. TMX IT acts as support and feeds information where necessary.

5. Incidents and Escalations

“Corporate Operations manages issues for the Clearing Members.”

5.1 IT Related

- CDCC has a formal process with regards to the tracking of IT related issues. This process is initiated by an e-mail which creates a ‘Tracking Ticket’ for TMX-IT. The format of the subject line assists TMX-IT with the understanding of the severity of the issue.
- Corporate Operations immediately follows the ticket e-mail with a phone call to TMX-IT representatives on any ‘Severity 1’. A ‘Severity 1’ (system or link down) will result in the ‘Service Interruption Process’ being initiated.
- On ‘Severity 1’ issues, Corporate Operations issue statuses to the Clearing Members at approximately 30 minute intervals.

5.2 Business Related

- In the majority of queries made to Corporate Operations, an answer is provided to Clearing Members directly on the call. On all other issues where further investigation is required, Corporate Operations will keep the Clearing Members informed of the status of their request as soon as an update is received, or at the latest by the end of the day.
- CDCC has a tracking application for non-IT related issues.
- Escalation – in the case of emergencies (e.g., Clearing Member back office down), the Clearing Members can escalate to the Coordinator, Operations, or the Director, Corporate Operations.
- Processes are in place to escalate settlement issues to management if required.

What is a Severity 1 Issue?

A Severity 1 is the most serious of issues the service can have. A Sev1 issue is an issue that prevents Clearing Members from conducting business.

Severity 1 issues include:

- Loss of Link (Connectivity) with CDCC and Montreal Exchange
- Disaster Recovery (DR) Situation

What is a Severity 2 Technology Incident?

A Severity 2 is the second most serious of issues the service can have. A Sev2 issue is an issue that severely disrupts a Clearing Member, but does not prevent Clearing Members from conducting business.

Severity 2 incidents include:

- Multiple incidents of same report

What is a Severity 3 Incident?

Severity 3 are all incidents that do not fall under Severity 1 or Severity 2 as defined above. These issues do not restrict or prevent a Clearing Member from conducting business.

Severity 3 incidents include:

- Incorrect data sort on a report
- Display Errors, e.g., date, etc.

5.3 Technology Incident Management Process

Technology Incident Management is the process that is invoked to deal with technology incidents that are Severity 2 and Severity 3 (issues and problems) but **are not** considered Severity 1 issues.

1. A Clearing Member, Corporate Operations, or CDCC Technology Support identifies when a problem occurs and contacts Corporate Operations.
2. Corporate Operations does an assessment of the incident to categorize the severity.
 - Is it a technology issue? Yes/No
 - Does it impact the Montréal Exchange? Yes/No
 - Can the Clearing Member conduct business? Yes/No
3. Corporate Operations opens a ticket on the incident in the technology ticketing system via sending an e-mail to TMX-IT marked URGENT. They resolve the incident or escalate to 'Level 2 Support' within the TMX-IT group.
4. The ticket is resolved at Level 2 Support or assigned to Level 3 Support.
5. Corporate Operations is provided with regular internal updates and updates the Clearing Member on the incident as appropriate.

5.4 Severity One (Sev1) Escalation Management

Severity 1 Escalation Management is the process that is invoked to deal with incidents, issues and problems that are considered Severity 1 issues.

1. Clearing Members, Montréal Exchange or internal CDCC department notifies Corporate Operations of a Severity 1 condition.
2. The CDCC Service Interruption Committee is activated by CDCC's President & Chief Clearing Officer or a designated person in collaboration with TMX-IT. The committee consists of the following CDCC management members:
 - President & Chief Clearing Officer
 - Director, Corporate Operations
 - Vice President, Risk Management & Chief Risk Officer
 - Director, Strategic Initiatives
 - TMX-IT, PMO
 - TMX Legal Affairs
3. A ticket is opened and categorized as a Severity 1 issue in the TMX-IT ticket system.

4. Corporate Operations will notify the Montréal Exchange Market Operations Department (MOD), if required, of the Severity 1 condition if the Severity 1 does not involve CDS. If the Severity 1 involves CDS then MX Severity 1 Team is activated and a ticket is opened.
5. Corporate Operations coordinates the internal CDCC departments' efforts and MX MOD coordinates the internal Montréal Exchange departments' efforts and reports back to CDCC Corporate Operations.
6. CDCC departments work together to resolve the Severity 1 condition. Corporate Operations remains the centre point for all Severity 1 issues.
7. The Montréal Exchange departments work together to resolve the Severity 1 condition.
8. The MOD remains the centre point for all Severity 1 items at the Montréal Exchange and in turn communicates with CDCC Corporate Operations.
9. Corporate Operations notifies CDCC TMX Legal Affairs who in turn notify the regulator of the Severity 1 condition.
10. Corporate Operations provides with updates every 15 minutes on the Sev1 issue to the CDCC Service Interruption Committee and the Montréal Exchange MOD/MX Service Interruption Committee, if required. Corporate Operations provides Severity 1 updates to Clearing Members approximately every 30 minutes until the situation is resolved. The Montréal Exchange MOD is also responsible to provide an update to Corporate Operations on behalf of the Montréal Exchange departments involved in the Severity 1 condition.
11. TMX-IT is responsible to collect information related to the Severity 1 situation which will be used for the reporting going to the regulators.
12. Once the Severity 1 condition is resolved, Corporate Operations is advised and communicates with appropriate stakeholders that the situation has been resolved. The Service Interruption Committee(s) are deactivated and the ticket closed.
13. A post Severity 1 issue report is provided to the regulators and CDCC Service Interruption Committee by TMX-IT on the issue, the resolution and steps taken to mitigate the issue from reoccurring in the future.

6. Change Management Process

As part of its project management processes, CDCC ensures that its Clearing Members are aware of any and all system changes that may have downstream impacts.

Communication to the Clearing Members is managed via the following methods within a project:

- As part of its Users' Group process, CDCC reports to the Clearing Members the status of active projects. An open dialogue is held with regards to potential downstream impacts.
- On major initiatives, Operational Working Groups are formed. In the past, this was done for CDCC's clearing system change and the Symbology change in the Options market.
- Operational Notices are used to formally inform the Clearing Members of upcoming changes.
- Phone contact is used when necessary.

In general, CDCC is committed to avoiding situations that impact downstream impacts such as changes to a Data Service file.

7. Risk Management

Detailed information may be found within the Clearinghouse's formal Risk Manual. The **Risk Manual** is an integral component of the Operations Manual. This document is available on CDCC's web site (www.cdcc.ca), at the following link:

http://www.cdcc.ca/publications_rules_en .

The following is a high level overview with regards to CDCC's Risk Management processes.

7.1 Margin Requirements

CDCC requires that every Clearing Member deposit into an account with the Corporation an initial margin to cover the performance of positions held, therefore reducing the risk of a defaulting Clearing Member. CDCC can also issue a margin call requiring a Clearing Member to deposit extra acceptable collateral or securities into his account to bring his margin account up to the maintenance margin. The maintenance margin or variation margin is the minimum amount of collateral that must be kept in the margin account at all times.

7.2 Specific Wrong-Way Risk for an Unsettled Item

CDCC may request additional margin from a Clearing Member, at CDCC's sole discretion, at the expiration of an Option position subject to Specific Wrong-Way Risk. For Specific Wrong-Way Risk for Unsettled Items, CDCC may charge the full strike value amount of the Option position.

7.3 Additional Margin for Intra-Day Variation Margin Risk

CDCC will apply additional margin for Futures contracts where Intra-Day Variation Margin Risk, as defined in the Risk Manual, arises.

7.4 Daily Capital Margin Monitoring Calls (DCMM)

CDCC has set up daily capital margin monitoring to evaluate the credit risk of its Clearing Members. Daily tracking of a Clearing Member's margin and capital enable CDCC to determine whether a Clearing Member is in a precarious financial position.

7.5 Clearing Fund Deposits

For added protection against a defaulting Clearing Member, CDCC requires that every Clearing Member contribute to the Clearing Fund. If a Clearing Member defaults, CDCC will liquidate the defaulting Clearing Member's margins and utilize his contributions to the Fund. CDCC will use other Clearing Members' contributions if the defaulting Clearing Member's margins and Clearing Fund deposits are insufficient to cover the loss.

7.6 Approved Collateral

CDCC takes a conservative approach to manage the securities accepted for margin deposits and to calculate haircuts that apply to these assets. Haircuts account for the potential loss of value if CDCC needs to liquidate the securities.

7.7 Default Management

A fundamental objective of a CCP is to guarantee the integrity and continuity of payments and processes even in the event that a Clearing Member defaults on its obligations. CDCC has developed a default process to ensure that efficient mechanisms and processes are in place and are capable of limiting the adverse impacts of such an event.

8. Service Level Commitments and Performance Management

8.1 Corporate Operations

Corporate Operations performs Operational Support for the Clearing Members and the Clearinghouse:

- To ensure that CDCC's commitment to the Clearing Members with regards to timelines, as defined in **Section 2** of the **Operations Manual**, are met.
- Contingencies for report & file deliveries
- 'How to' questions for CDCS
- End User Training
- Access Management
- Configuration – ISINs, CUIDs, Internal Accounts, Products, CDS Ledger Account in the Futures contract etc.

Corporate Operations manage issues for the Clearing Members.

IT Related

- CDCC has a formal process with regards to the tracking of IT related issues. This process is initiated by an e-mail which creates a 'Tracking Ticket' for TMX-IT. The format of the subject line assists the IT in knowing the severity of the issue. CDCC also has a tracking application for non-IT related issues.
- Corporate Operations immediately follows the ticket e-mail with a phone call to TMX-IT representatives on a 'Severity 1'. A 'Severity 1' (system or link down) will result in the 'Service Interruption Process' being initiated.
- On 'Severity 1' issues, Corporate Operations issue statuses to the Clearing Members at approximately 30 minute intervals.

Business Related

- In the majority of queries made to Corporate Operations, an answer is provided to Clearing Members directly on the call. On all other issues where further investigation is required, Corporate Operations will keep the Clearing Members apprised of the status of their request as soon as an update is received, or at the latest by the end of the day.
- Escalation – in the case of Emergencies, the Clearing Members can escalate to the Coordinator, Operations or the Director, Corporate Operations (i.e. Clearing Member back office down)
- Processes are in place to escalate settlement issues to management if required.

Corporate Operations manages access to the system for the Clearing Members.

- CDCC's CDCS (Canadian Derivatives Clearing Service) is a tiered application with connectivity across a number of enterprise servers.
- Corporate Operations arranges access to CDCS on behalf of the Clearing Members.
- Corporate Operations is responsible for reconciling access to CDCS within its Internal Audit process.
- Clearing Members must designate Clearing Member Security Officers for requesting CDCS access.

8.2 Access Management

Potential new Clearing Members work with the Director, Corporate Operations to apply for Membership.

The Director, Corporate Operations directs the applicant with regards to the application process and manages the process within CDCC.

8.3 Canadian Derivatives Clearing Service (CDCS) Access

New employee – Clearing Members must complete a form. This form is available on the CDCC Extranet. The form is to be completed, scanned, and e-mailed to cdcc-ops@cdcc.ca. CDCC management will create the access and inform the Clearing Member via e-mail when the IDs are available. This access will be completed within two (2) business days (urgent requests can be done within one (1) to two (2) hours).

Password reset – Clearing Members must complete a form. This form is available on the CDCC Extranet. The form is to be completed, scanned, and e-mailed to cdcc-ops@cdcc.ca. Corporate Operations typically addresses this within 15 minutes. If the Clearing Member requests a reset without a form, Corporate Operations staff will supply the link to the form to expedite this task.

FTP/SFTP Access – Clearing Members must complete the request for FTP/SFTP access. Clearing Members can choose which method is to be done. The form is to be completed, scanned, and e-mailed to cdcc-ops@cdcc.ca.

Senior Representatives from Corporate Operations will work with the Clearing Members and the TMX-IT area to arrange the access.

Corporate Operations monitors and supports the settlement process for the Clearing Members.

Corporate Operations will be pro-active, and on an on-going basis, monitor the settlement process in the CDCS screens to work with the Clearing Members to avoid the possibility of 'gridlock'. More specifically:

CDCC will reach out when requested by a Clearing Member to address issues with regards to a Futures settlement daisy chain.

Situation	Action
CDCC is pending to receive (Intra-Day).	Corporate Operations will contact the deliverer to inquire on the situation and expected delivery time.
CDCC is pending to receive (End-of-Day).	The failed Futures contract NSP (net settlement position) will be rolled to the next business day.
CDCC is pending to deliver on a Net Settlement Position of the Underlying on a Futures contract and has ledger position (Intra-Day).	
Level 1: When a Clearing Member is not buying bonds from CDCC due to lack of funds/ACV on their part.	Contact Clearing Member Operations.
Level 2: When a Clearing Member is not buying bonds from CDCC due to lack of funds/ACV on their part AND CDCC's Line of Credit within CDSX is fully used as a result of this situation.	Notify CDCC Management, Contact Clearing Member Operation Management.
Level 3: Intervention by CDCC Management from the Level 2 condition has not brought the expected result and/or it is approaching 3:00 p.m.	Notify CDCC Management and Board and/or Contact Clearing Member Executive Management and/or Contact Problem Management Group.
CDCC is pending to deliver a Net Settlement Position of the Underlying on a Futures contract and has ledger position (End-of-Day). Clearing Member will be considered in 'Non-Conforming' status (Ref CDCC Rule A-806 subsection 2 published in Omnibus II).	Leveraging from Level 3 intervention, notify CDCC Management, Contact Clearing Member Executive management to inform as well as Clearing Member's Operations management to initiate the exception process to settle the funds in LVTS and security in CDSX (Renew).
	Upon CDCC receiving the LVTS funds transfer, the Clearing Member is no longer considered to be "non-conforming" (Ref CDCC Rule A-1A04 subsection 6). Otherwise, the situation may be escalated.

Corporate Operations monitors and supports the settlement process for the Clearing Members: Net Payment Against Delivery Requirement and issue reports (FTP/SFTP).

10:15 a.m.: CDCC has an automated process to monitor the Clearing Members' PIT Settlement Obligation on Net Settlement Position of the Underlying on a Futures contracts. Part of this process is to generate a report. Clearing Members with a Payment Obligation greater than 0 will be contacted by phone and will be e-mailed a copy of the report.

10:30 a.m.: Part of this process is also to generate a second version of the report. If a Clearing Member has not met his Net Payment Against Delivery Requirement of the Net Settlement Position of the Underlying on the Futures contract, he is heading towards 'Non-conforming'

status. The Clearing Member's operation management will be contacted as well as CDCC Management.

11:00 a.m.: If a Clearing Member has unfulfilled requirements, he is in a 'Non-conforming' status. The Clearing Member Executive management, CDCC's Management & Board will be contacted. The Problem Management Group will be advised. The situation may be escalated if not resolved promptly.

CDCC's Line of Credit usage in CDSX (\$600,000,000)

As described previously, Corporate Operations will actively monitor settlements and will be pro-actively initiating actions to resolve pending transactions that are using CDCC's line of credit.

CDCC will have confirmation in CDCS when its Line of Credit is fully used by observing trades where CDCC is the buyer and the pending reason code is for buyer's insufficient funds. As well, CDCC can monitor its Line of Credit usage via its CDSX 3270 terminal access (green screen).

CDCC Aggregate Collateral Value (ACV) in CDSX

CDCC has on deposit \$15,000,000 of Government of Canada bonds in CDSX solely for ACV purpose.

CDS risk model haircuts for Government of Canada securities vary from 0.5% (less than 1 year to maturity) to 3% (over 10 years to maturity). By having \$15,000,000 of Government of Canada bonds, this would provide CDCC sufficient ACV to simultaneously settle anywhere between \$333,000,000 and \$2,000,000,000 worth of buys.

Since all transactions are split in \$50,000,000 lots within CDSX and that transactions are assessed individually by the CDSX risk model, CDCC believes it will have more than sufficient ACV within CDSX.

Should the case arise where CDCC is pending to buy because of insufficient collateral, CDCC Corporate Operations would be aware by the settlement monitoring processes.

Corporate Operations monitors and supports CDCS for the Clearing Members. Exception Processing

CDCC has automated processes to monitor and inform Corporate Operations of any issues within the following 'Exception Processing' areas:

- MQ Series Messaging Monitoring
- Exception processing (CDSX rejections, unexpected new trade notification from CDSX, etc.)
- CDCS – CDSX – Reconciliation

Incidents in these areas are considered to be unlikely to occur, however if they do they would initially be considered to be a Severity 1 problem. It should be noted that upon initial investigation that an incident could have its severity changed (i.e. *MQ Series delay could be due to high volume at CDS*).

As with all Severity 1 technology issues:

- CDCC Management would be immediately informed.
- Clearing Members would be immediately informed.
- CDCC's Regulators would be informed.
- Clearing Members would receive updates at approximately 30 minute intervals until the issue is resolved.

The Corporate Operations team is responsible for the Operational Support for the clearinghouse. This involves the overseeing of CDCS as well as:

Margining

CDCS runs two Intra-day margin cycles per day. Corporate Operations ensure that the function starts on time and completes as expected.

Internal Account Structure

Corporate Operations will configure the system with the Clearing Members' Internal Account structure.

Security (ISIN) Set-up

Corporate Operations, with Risk Management support, configure the securities for Exchange Traded Products.

System Configuration

- Corporate Operations performs all system configuration – examples are:
- User IDs
- Holiday Schedule
- Products

Training

Corporate Operations will work with the Clearing Members to train new staff.

8.4 Daily Schedule

8.5 Service Delivery Targets

1. **When will reports be available on FTP/SFTP server?**

By 7:00 p.m. Eastern Time from Monday to Thursday. It must be noted that on Weekly Options Expiration Friday reports are available by 8:00 p.m. Eastern. On the third Friday of the month, part of CDCC's batch runs until 11:00 p.m. approximately. The MA01 and MS01 reports will not be generated before midnight.

2. **When will Tag Log Files be available on FTP/SFTP server?**

By 7:00 p.m. Eastern Time from Monday to Thursday. It must be noted that on Weekly Options Expiration Friday tag logs are available by 8:00 p.m. Eastern. On the third Friday of the month, part of CDCC's batch runs on until 11:00 p.m. approximately. The tag logs for the MA01 and MS01 reports will not be generated before midnight.

3. **When will Vendors' Data Service Files be available on FTP/SFTP server?**

By 7:00 p.m. Eastern Time.

4. **When will DK Settlement Instructions be transmitted to CDSX?**

Before 7:00 p.m. Eastern Time

5. **When will Next Day (for Batch Net Settlement) Settlement Instructions be transmitted to CDSX?**

Before 7:00 p.m. Eastern Time.

6. **How quickly can we obtain new CDCS User Profiles?**

Clearing Members' Security Officers must complete a form. This form is available on the CDCC Extranet. The form is to be completed and scanned and e-mailed to cdcc-ops@cdcc.ca. CDCC management will create the access and inform the Clearing Member via e-mail when the IDs are available. This access will be completed within two (2) business days.

7. **When is Corporate Operations' staff available?**

From 7:00 a.m. to 5:30 p.m. Eastern Time.

8. **What is CDCC's Disaster Recovery Plan's RTO (recovery time objective)?**

It is two (2) hours. This is documented within CDCC's Internal Audit program (CSAE 3416). CDCC's systems are mirrored and replicated. CDCC's physical data centres are in different cities.

9. **How quickly are user queries turned around?**

Phone - immediately.

E-mail - within 15 minutes.

10. How quickly does CDCC inform the Clearing Members of Severity 1 Issues?

CDCC will notify the Clearing Members within 30 minutes of an occurrence. CDCC will give status updates at approximately 30 minute intervals until the issue is closed.

11. Does CDCC have a commitment to meet its daily schedule?

CDCC's **Operations Manual** is considered an extension of its Rules. CDCC has an obligation to follow its Rules at all times. If a situation arises that a schedule is not met, CDCC has processes to address issues; including taking corrective action. In the case of Severity 1 issues, CDCC informs its Regulators of the issue as it occurs and must formally submit a report to the Regulator.

12. Does CDCC monitor system performance?

CDCC Management receives a "Dashboard" from its IT supplier on a monthly basis. This dashboard monitors response time as well as transaction loads, peaks etc.

9. Governance Framework

9.1 Canadian Derivatives Clearing Corporation

The following is a high level overview of the functioning and governance for CDCC and its services:

- CDCC is a wholly owned subsidiary of the Montréal Exchange Inc.
- CDCC's lead regulator is the Autorité des marchés financiers (AMF). CDCC is also regulated by the Ontario Securities Commission (OSC) and the British Columbia Securities Commission (BCSC). CDCC's systems; CDCC is designated as systemically important and as such CDCC is also regulated by the Bank of Canada.
- CDCC's Board of Directors consists of nine individuals of which two are independent and two are from the industry.
- CDCC has a Risk and Audit Committee which reports to the Board of Directors.
- CDCC has a Governance Committee which reports to the Board of Directors.
- Risk Management is supported by a Risk Management Advisory Committee (RMAC). This committee is comprised of CDCC Risk Management staff and Clearing Member representatives with experience within risk management, with observers from the AMF, Bank of Canada, MX Regulatory Division and the Montréal Exchange. Minutes from this Committee are formally submitted to CDCC's Board of Directors.
- Corporate Operations holds quarterly Users' Group meetings. There are two Users' Groups: one for Fixed Income Products and one for Exchange Traded Products. These meetings are intended as a two-way communication tool for the clearinghouse and the Clearing Members. The minutes from these meetings are formally submitted to CDCC's Board of Directors.
- CDCC has a formal Internal Audit program. This is the CSAE3416. The annual and interim reports are presented to the Board of Directors and the Regulators.

10. Margin Processing

Detailed information with regards to CDCC's Margin Processing may be found within the clearinghouse's formal **Risk Manual**. The **Risk Manual** is an integral component of the **Operations Manual**. This document is available on CDCC's web site (www.cdcc.ca) at the following link:

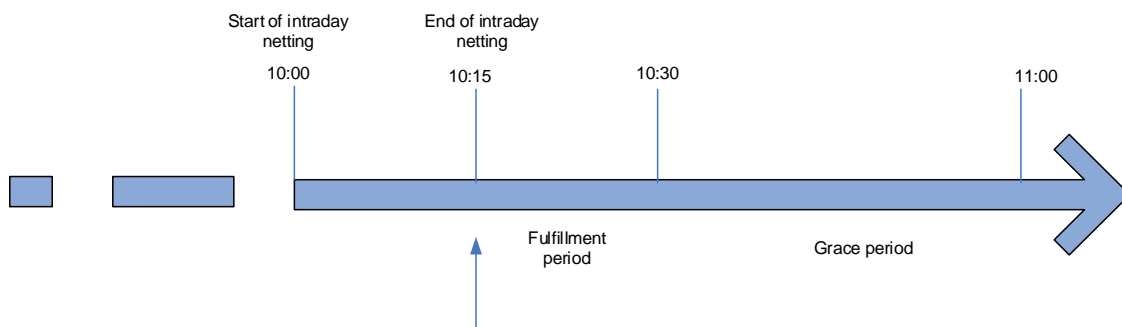

http://www.cdcc.ca/publications_rules_en

CDCC has three margining cycles:

- Intra-Day margining is run at:
 - 10:30 a.m.
 - 12:45 p.m.
- Overnight margin processing commences at approximately 5:30 p.m.

11. Point-in-Time Processing

11.1 Net Payment against Delivery Requirement Management (PIT Settlement Obligation) for Underlying on Futures contracts

11.2 Net Payment Obligation for Underlying on Futures contracts Calculation

Morning Net Payment against Delivery Requirement Calculation
Lesser of A: CDCC's Line of credit in CDSX (\$600,000,000) or B: Sum of buys that were submitted as part of intraday netting that are pending due to participant's lack of funds and/or collateral
Requirement Fulfillment Calculation
Sum of 1- Sum of settled buys during the fulfillment period (and grace period if applicable) and 2- Sum of the net amounts for all CDS Settlement instructions identified in the calculation of 'B' here above where the status is still pending, but the PendingPartyAtFault is changed to 'Sell'
Afternoon Payment Against Delivery Requirement Calculation
Sum of buys that failed due to participant's lack of funds and/or collateral

“Corporate Operations monitors and supports the settlement process for the Clearing Members.”

CDCC has an automated process to generate the calculation of the Net Payment Against Delivery Requirement and issue reports.

10:15 a.m.: The automated process monitors the Clearing Members' PIT Settlement Obligation. Part of this process is to generate a report. Clearing Members with a Payment Obligation greater than 0 will be contacted by phone and will be e-mailed a copy of the report.

10:30 a.m.: Part of this automated process is also to generate a second version of the report. If a Clearing Member has not met their Net Payment Against Delivery Requirement, they are heading towards 'Non-conforming' status. The Clearing Member's operation management will be contacted as well as CDCC Management.

11:00 a.m.: If a Clearing Member has unfulfilled requirements, they are in a 'Non-conforming' status. The Clearing Member Executive management, CDCC's Management & Board will be contacted. The Problem Management Group will be advised. The situation may be escalated if not resolved promptly.
