- Final settlement

Centralized Business Processes

Anonymity

Scalability: no position limits

Optimal usage of capital and collateral

Risk Mutualization

Option Pricing

For margin calculation purposes, CDCC computes a daily theoretical price for each customized equity option cleared through Converge.

Option Pricing Models

The option pricing model to use depends on the exercise style of the option:

American-style

- Barone-Adesi & Whaley

European-style

- Black-Scholes

Volatility

The volatility estimate, used as an input when computing the customized option’s price, depends on whether or not the underlying has a listed option at the Montréal Exchange (MX):

Underlying has a listed option at MX

- Implied volatility derived from listed option prices

Underlying does not have a listed option at MX

- Historical volatility of underlying (annual)
